PRESS RELEASE

For immediate release

KNICK EXPLORATION CONFIRMS NEW HIGH GRADE GOLD VALUES FROM ITS EAST-WEST PROPERTY

Val-d'Or, Quebec, February 24, 2010 – Knick Exploration Inc. (TSX-V: KNX) (“Knick Exploration” or “the Company”) is pleased to confirm high grade gold values on its newly discovered gold area situated in the eastern part of its East-West property, 500 meters west of the Kiena Gold Mine property.

Mechanical stripping and drilling in 2009 successfully led to the discovery of this new gold zone, suggesting continuity from surface to 75 meters vertical depth. The gold zone has been traced laterally for 100m, along sections 25 meters apart and is open at depth and along strike. Best drilling results include:

2009 EAST AREA DRILLING RESULTS

- **37.13 grams per tonne gold over 0.30 meters**
- **13.10 grams per tonne gold over 0.40 meters**
- **11.15 grams per tonne gold over 1.95 meters**
- **10.08 grams per tonne gold over 1.45 meters**
- **4.39 grams per tonne gold over 1.30 meters**

Download a complete table of drilling results in PDF format from:

http://www.knick.ca/file.php/East_West_Feb_2010_DDH.pdf

President's Comments:

Drilling continues to prove high grade gold directly under the newly uncovered stripping area. Our geologists have clearly discovered a promising area and believe the key to success lies with further exploration at depth.

2009 CHANNEL SAMPLING RESULTS ; EAST-WEST STRIPPING

(Along a strike length of 85 meters)

- **38.26 grams per tonne gold over 0.50 meters**
- **26.67 grams per tonne gold over 0.90 meters**
- **10.01 grams per tonne gold over 0.40 meters**
- **7.99 grams per tonne gold from grab sample**

- **5.04 grams per tonne gold over 0.50 meters**

Sample analysis was performed by Expert Laboratory in Rouyn-Noranda, Quebec.

Gordon N. Henriksen, P.Geo., Vice President of Knick Exploration, is the Company's qualified person as defined by National Instrument 43-101. He has reviewed and approved the contents of this press release.
